

EU CERTIFIED ORGANIC* SALMON

THINK ORGANIC* SALMON

Tropical sources fresh EU Certified **Organic* Salmon** from multiple farms in order to bring a year-round supply of salmon to the US market.

We supply fresh EU Certified **Organic* Salmon** from farms that are family owned and vertically integrated.

***CERTIFIED ORGANIC BY THE ORGANIC FOOD FEDERATION OF THE EU.**

Organic* Salmon is farmed to the EU Organic standard and certified by Global Trust.

The salmon farms have total control of the entire organic process from hatchery to dispatch.

Salmon from organic farms are raised in a low-density environment with a maximum of 1% fish to 99% water. The fish are fed a diet free of GMOs, which contains only natural pigments and marine content from sustainable fisheries.

Free of chemicals, antibiotics or Genetically Modified Organisms (GMOs).

*Farmed to the EU Organic standard and certified by Global Trust

Organic salmon farmers give priority to the health and welfare of each fish:

- On average, the salmon have more than 10,000 m³ of water to swim in, which means that every two fish share 1,000 liters (264 Gal.) of pure seawater.

- Sites used for organic farming are fallowed (uncultivated) for a minimum of 4 months after the site is empty - compared to 2 months for conventional sites.

- Low-density, combined with the strong coastal currents, ensure vigorous exercise - giving the salmon firm muscle formation, clean flavor and low fat content.

EU Certified **Organic*** **Salmon** is raised giving priority to animal welfare and to the long-term protection of the environment. All farm operations as well as the farm's surrounding environment are audited annually to ensure the highest organic standards are maintained.

EU Certified **Organic*** **Salmon** are harvested to the highest standards and dispatched within 24 hours - allowing us to maintain maximum freshness and quality in every fish!
