

RAINBOW TROUT

THINK RUBY RED TROUT

TROPICAL
AQUACULTURE PRODUCTS, INC.®

Tropical has partnered with Cold Water Fisheries to bring you a fresh supply of Canadian Rainbow Trout.

Canadian Rainbow Trout from Cold Water Fisheries is farmed in the pristine waters off the coast of Nova Scotia, Canada, in an environment free of chemicals, antibiotics or GMOs.

RESPONSIBLE FARMING SINCE 1987

The farm setup is open water aquaculture with net pens where fish swim freely for the entire farming-cycle. The cool, oxygen-rich waters surrounding the farm provide a healthy growing environment, optimal for trout cultivation.

The pristine farm location, combined with the proprietary feed, result in a rainbow trout of distinctive appearance, firm muscle formation and a vibrant flesh color, #26+ on the SalmoFan™.

Free of chemicals, antibiotics or GMOs and never treated with preservatives.

Cold Water Fisheries has more than one million eggs delivered to their hatcheries each year from Washington State. Eggs arrive to the hatchery at 4°C, then they're warmed up gradually in freshwater to 10°C to begin their life cycle.

The feed formula consists primarily of fishmeal, fish oil, grains, vitamins and minerals.

ALL NATURAL

Our **Canadian Rainbow Trout** is free of chemicals, antibiotics, GMOs or preservatives. The processing plant is a leader in meeting the stringent HACCP based Quality Management Program requirements. To ensure food safety, every trout is 100% traceable from farm to fork.

To maintain optimal quality throughout processing and deliver a product of excellent quality characteristics, each trout is harvested and immediately chilled to ensure maximum freshness.

Canadian Rainbow Trout is available to the North American market fresh, never frozen, daily.

Our **Ruby Red Canadian Rainbow Trout** have a delicate nutty taste and fork tender texture.

Rainbow Trout is available as:

Skin-on fillets - 8-12 oz.

Whole head-on gutted fish

Guaranteed 100% traceable all the way back to its origin.
